## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Belanger et al (US patent 5,784,748).

The patent to Belanger discloses the invention, a cleaning device, as is claimed. Belanger discloses a cleaning device (fig.2) having a cleaning element (32) having an axis and defining an axial inner region and an axial outer region. The outer region is bendable to follow a shape of a surface to be cleaned. A rigid holding element (30) and connecting element (28), both with through-going openings, cooperate one on top of the other to releasably hold the cleaning element at the axial inner region.

With respect to claim 5, defining that the engagement is with a “snap action” does not define any particular structure, at least none not shown by Belanger.

With respect to claims 6-9, note projection means (40) on the holding element (30) which pass through openings (49) in the cleaning element and engage in openings (28) on the connecting element.

*Allowable Subject Matter*

Claims 10-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Conclusion*

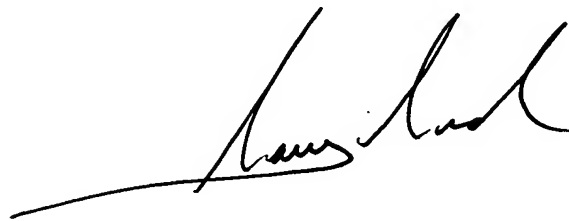

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
